

Reduce
your nitrogen
gas costs
with **i-Flow**

Nitrogen generation solutions for **Electronics Assembly & Storage**

Electronics & nanotechnology companies are familiar with the impact of oxygen contamination on efficiency and product quality. During assembly, atmospheric air creates thin oxide layers over and between connections, leading to several problems downstream, such as product defects that require additional reworking. Furthermore condensation creates moisture in storage environments, which causes corrosion and product degradation. These highly undesirable outcomes ultimately impact on both company reputation and customer satisfaction.

Protect your company's bottom line with on-site nitrogen generation.

- ▶ Save Money
- ▶ Control Costs
- ▶ Guarantee Supply
- ▶ Reduce Carbon Footprint

Soldering & dry-box storage

Nitrogen gas is the most cost effective industry solution. Dry, inert & non-conductive, it is used in storage and for reflow, selective or wave soldering surface-mount technology to printed circuit boards (PCBs), helping to:

- Increase soldering joint strength & reduce bridging/wetting defects
- Increase first-pass yields, ensuring minimal heat exposure
- Reduce requirement for reworking & flux residue cleaning
- Ensure a clean, dry & inert atmosphere for dry box storage

Key benefits of on-site nitrogen generation

Guaranteed supply
Increased efficiencies, maximum productivity and minimum downtime

Increased safety
No need for pressurized gas storage so safer than bulk delivery options

Less wastage
Consistent and reliable supply means fewer product defects or rejections

Eliminate on-going costs
No more equipment rental, long contracts or re-supply ordering

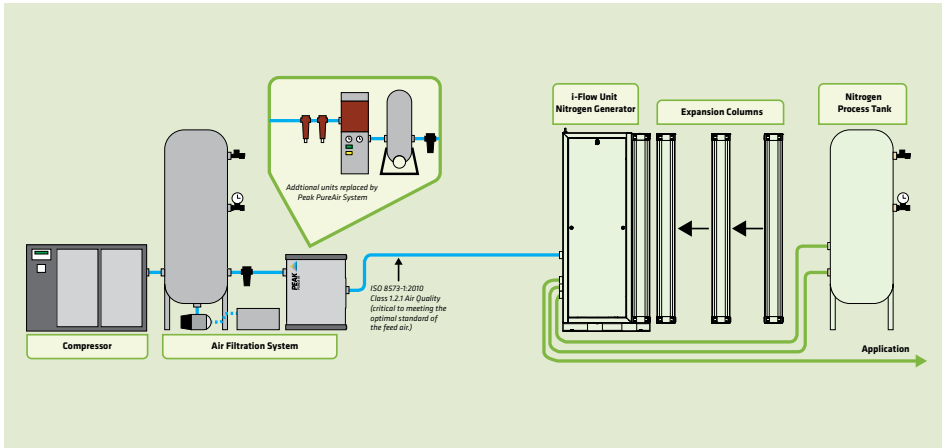

More sustainable
Reduced carbon footprint by eliminating trucking of cylinders to your site

Future proof
Expandable on-demand N2 generation that meets future needs

Typical nitrogen generation system

Consultative Solutions

Global Leader

Peak is the leading global manufacturer of nitrogen generation systems.

Turnkey Solutions

Our team of highly experienced consultants are experts in designing turnkey solutions that perfectly meet customer needs.

Expertise & Support

Our vast industry and technological expertise, coupled with world-class aftercare support, means we define the benchmark for customer service, innovation, quality and reliability.

Project Management

Our project teams manage every stage of the process through initial consultation, system design, procurement, installation/commissioning and keep you fully informed at each step.

Global Partnership

Together with our industry leading partners in compression & filtration technologies, we offer the best and most diverse technological solutions available on the market.

Your sustainable and expandable nitrogen generation solution

The i-Flow nitrogen generator from Peak Gas Generation eliminates the need for bulk nitrogen gas delivery and provides you with a sustainable, on-site nitrogen gas generation system that will deliver massive efficiency & cost savings in the long run.

It is a modular & scalable design that harnesses the latest in gas purification technologies, providing a wide range of purity and flow rates to suit most applications.

➤ **Economical & sustainable**

A cost effective solution that eliminates the need for bulk nitrogen gas delivery forever.

➤ **Expandable on-demand**

i-Flow's space saving, future-proof modular design allows columns & units to be added as your business grows.

➤ **Energy saving efficiency**

An innovative 'Eco-mode' ensures the lowest running costs by automatically managing production based on your daily demands.

➤ **Verified industry compliance**

Exceeding standards of EIGA, EC Food Grade, European Pharmacopoeia, JEFCA and US Food & Drug Administration (CFR Title 21) with Peak IQ/OQ certification.

➤ **Safe on-site supply**

No more health & safety concerns over hazardous truck deliveries or storage of gases in highly pressurized cylinders or tanks.

➤ **High quality engineering**

Peak is an ISO 9001 certified manufacturer and i-Flow's highly efficient technology requires minimal maintenance and supervision.

➤ **Expert consultation**

Peak's professional consultants will expertly design an end-to-end solution to meet your needs.
