## Our People are Our Greatest Asset

“Without question, our people are what make the organisation, without the people we wouldn't be where we are today”

Jonathan Golby, Sales and Marketing Director

We value enthusiasm, modesty, honesty and hard work. If you have the right attributes we can provide the necessary training.

Come see for yourself why Peak is not just a great place to develop your career—it's also an exciting place to work.

## Awards and Achievements

Here at Peak we deliver innovative products and outstanding service. The recognition we have received from government bodies and officials such as the “**Best Company to Work For**” only cements this belief.

Since 2004, Peak has won four Queen's Awards for international trade, exporting and enterprise, our most recent being in 2014. Our Managing Director, Robin MacGeachy also won the Ernst & Young Entrepreneur of the Year Award in 2014 for manufacturing.

At the very heart of Peak we have a dedicated management team providing dynamic vision and strong leadership. With the clear direction they provide and their vision for Peak's future, we expect to be adding more to the list in the coming years.

## Join the Peak Family

“Peak is all about fun and passion, we have pride and enjoyment in all that we do”

**Fiona Taylor, Head of Recruitment**

If you think you have what it takes to be a part of Peak then we would like to hear from you. A full list of our current vacancies appears on the careers section of our website; alternatively you can contact our recruitment specialists Fiona Taylor and Leanne Gordon with a copy of your CV.

# Welcome to Peak

Peak Scientific is a dynamic, fast growing company who specialize in laboratory gas generators for applications such as oil and gas analysis, environmental testing and pharmaceutical research. In addition to serving the scientific market, Peak also develops dedicated systems for many industrial applications through its sister company Peak Industrial.

Since its formation in 1997 Peak design engineers have been working hard to provide alternative gas solutions for laboratory and industrial applications. In designing reliable on-demand gas generators, we have removed the hassle and safety concerns associated with bulk storage or pressurized cylinders, creating a much safer working environment.

These innovative designs and Peak's unrivalled customer care are just some of the elements that have contributed towards Peak's success. However, more than anything, it is the innovation and the skills of our people that drive our global success.

The Peak family has grown to over 300 members with significant growth planned. With a local presence in over 20 countries, Peak can firmly claim to be a truly global organisation with offices on every continent.

*In addition to the immediate Peak family, we are also supported by authorised distributors and service partners in a further 70 countries worldwide.*
