<p>* Typical settings as recommended by Thermo Fisher Scientific do not exceed 30L/min, however at max gas settings with the HESI and HESI-II probe the gas demand can exceed the capacity limit of the Solaris XE and Genius XE 35 generators. In this instance the Infinity XE 6010 and Genius XE 70 will meet the gas demands for a single instrument and the Infinity XE 6020 will meet the gas demands for two instruments. These settings are unlikely to be used for analysis as they are not optimum. The application flows must be verified before selecting the appropriate gas generator.</p>

# Not all warranties are equal.

What differentiates PEAK from other gas generator manufacturers is that a PEAK gas generator comes with a truly comprehensive on-site warranty. This means that in the unlikely event that your gas generator develops a problem, we will send a PEAK Certified Field Service Engineer to your laboratory to try to resolve the issue on-site and get you back up and running with minimal fuss and disruption.

What's more, when we say fully-comprehensive, we mean it. Every part of your generator is covered during warranty. While other manufacturer warranties may only cover certain components or require the return of your generator to the factory for repair, leaving you without gas for weeks or even months, our warranty is designed to give you complete peace of mind.
